

VIII International FuegoRED 2017 Workshop

“Scientific-technical approach for the management of large fires: implementation of new technologies”

17th – 20th October 2017

University of León (León, Spain)

(Second Announcement: registration and call for abstracts)

Dear Colleagues,

The Applied Ecology Research Group of the University of León organizes the **VIII International FuegoRED 2017 Workshop** that will be held in the Faculty of Biological and Environmental Sciences of the University of León (Spain) along the 17th, 18th, 19th and 20th of October. The theme of the Workshop will be the “**Scientific-technical approach for the management of large fires: implementation of new technologies**”. The Workshop sessions will therefore focus on the application of new technologies for monitoring the recovery and the post-fire management of fire-prone ecosystems that have been subjected to large wildfires.

The Workshop programme comprises two full-days for oral and poster presentations and one field-trip day in which the attendants will visit and discuss in situ the impact of large forest fires at the Atlantic-Mediterranean transition zone, together with the post-fire management measures implemented in the burned area. Besides, aiming to encourage the attendance and participation of young researchers, the Thematic Group of Forest Fires (GITF) from the Spanish Association of Remote Sensing will organize a training course on the “Analysis of forest fires using satellite imagery and software from open sources” on the 17th October.

All the information on the Workshop will be available and updated at the Workshop webpage:

SCIENTIFIC CONTRIBUTIONS

Scientific contributions will be presented as oral or poster presentations. The **oral presentation** time is 15 minutes including time for questions. **Poster contributions** consist of a 4 minutes oral presentation plus 1 minute for questions during the poster sessions. The highest printed format of the poster presentation is 100 cm x 80 cm.

The abstract of the scientific contribution must contain **up to 400 words** and must follow the abstract template available in the Workshop webpage (fuegored2017.unileon.es). All abstracts must be submitted to ulefured@unileon.es before the 15th July 2017. Abstracts can be written in **Spanish** or in **English**. At least one of the authors of the scientific contribution must formalize registration to the VIII International FuegoRED 2017 Workshop for acceptance of the abstract.

Authors are invited to submit an extended version of the abstract presented at the Workshop to be published in the journal FLAMMA. **Those delegates who are interested in publishing their scientific contribution as extended abstract are requested to indicate it in the registration form.** The deadline for submitting the extended abstract of the scientific contribution to the journal FLAMMA is 30th September. The extended abstract must follow the author guidelines of the journal FLAMMA, must not exceed a maximum of 4 pages, including figures, tables and references, and should follow the approved template ([available at the Workshop webpage](#)).
